Albert Elmgart

Relevant Work & Core Team

About

I design applied AI and automation systems by working directly with operators to understand how their business actually functions. My strength is translating messy workflows into structured, high-leverage systems that extract signal and create scalable execution paths.

Recent builds have focused on creator and e-commerce environments, where automation and intelligent decision systems can unlock disproportionate impact.

Selected Work

CreatorBrands.xyz — AI Product Launch Assistant

Live demo: video

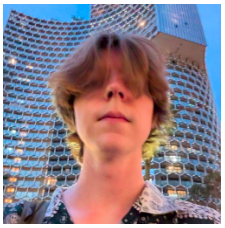
Try it yourself: https://creatorbrands.vercel.app/

End-to-end AI tool built for creators. A user inputs their Instagram handle, the system analyzes their profile, asks structured context questions, and generates tailored product launch recommendations.

The goal was to automate niche analysis and product matching in a way that feels practical, not theoretical. Tested with real creators. Built as a functional prototype demonstrating applied AI in e-commerce.

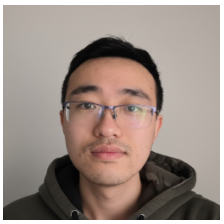
Core Team

Albert Elmgart — Product & Systems



I work closely with operators to understand how their business runs, where signal is lost, and where leverage can be created. My focus is translating real workflows into structured, high-impact systems.

Shaoxuan Yin — AI Developer



Met at a hackathon we hosted and decided to continue building together.

Master's background in AI. Focused on model logic and production-grade system architecture. Previously collaborated with Albert on AI consulting projects delivered under NDA, centered around automation and applied decision systems.

Profile: https://ohao.tech/@qervas

Matthews — Shopify Advisor

Met through Network School. Six years building Shopify apps, including independent apps reaching six-figure revenue. Advises on architecture, integration strategy, and scalable development paths.

Consultant — Shopify Conversion Specialist

Senior Shopify consultant brought in for tightly scoped strategic analysis when needed. Engagements are structured around extracting signal efficiently and implementing internally.

Notes

Currently compiling additional case material and references from prior engagements. Happy to connect you with previous collaborators where relevant.
